miles@server1:~$
```

Centos:

```
[miles@localhost ~]$ yum repolist
repo id                                repo name
appstream                              CentOS Stream 8 - AppStream
baseos                                 CentOS Stream 8 - BaseOS
epel                                    Extra Packages for Enterprise Linux 8 - x86_64
epel-modular                           Extra Packages for Enterprise Linux Modular 8 - x86_64
extras                                 CentOS Stream 8 - Extras
extras-common                           CentOS Stream 8 - Extras common packages
[miles@localhost ~]$
```

ubuntu

You can add repos by typing in the terminal `sudo add-apt-repository ppa:` and then the the ppa after.

Centos:

In centos you would use `wget` and the repository link after
